"FOOD PROCESSING MACHINES MANUFACTURING"

PIN MILL:

Features & Benefits:

- Customized design
- Easy to maintenance and cleaning
- Easy to operate , save time & power
- Easy to replace the parts according to the product
- Highly efficient
- Used of high precision components

Pin mill is combinations of universal pin mill were pin mill id vertically assembled and universal pin mill is horizontal assembly. Raw materials is feed into the grinding chamber from the feeding hopper were all the product is grinded . flittered and move to cyclone and to the storage tank. The product in the pin mill is crushed between two plate to Achieve exceptionally high grinding finish at low energy consumption. Pin mill is suitable for grinding all kind of grains, beans, rice, sugar, high fiber etc.

Other Industries and Applications of Roasting Machine

- Pharmaceutical Industry
- Chemical Industry
- Agricultural Product
- Food Industry

Model Name	SE UP500
Machine Capacity	300-500 KG
Material	SS 304 /CAST IRON BODY
Power	7.5 HP
Size	CUSTOMISED
Application	PULVERIZING
Product Type	PIN GRINDING
