

ROASTING MACHINE:

Features & Benefits:

- Easy To Maintenance And Cleaning
- Uniform Roasting On Each And Every Product
- The Motor Speed Can Be Adjusted As Required
- Automatic Product Discharge
- Fast, Efficient Mixing Of Free-Flowing Materials With Virtually 100 Percent Product Discharge
- Used Of High Precision Components

Roasting machine is suitable for roasting all kind of dried fruit, nuts and spices such as chest nut, peanut, chill, pepper, etc. Inner tank is made of stainless steel. Burn is covered with uniform thickness glass fiber wool and good flatness and good heat preservation effect. In gas heating type regulation burner we can adjust the flow according to the heat required and in electric heating type we can set temperature controller that help in controlling the temperate of the roasting machine.
